

HIGH PRESSURE BLOWER

RB500

The RBS00 blower is a centrifugal blower designed for airflows up to 200 CFM (at approx. 60" of water). This unit has aluminum impeller and housing and is belt driven. The RBS00 blower has a Single Phase, 115/230V motor. These are excellent for pulling low volume vapors from small tanks and vessels.

Specifications

- 3HP, 115 / 230 V TEXP Motor (Hazardous Location)
- Skid Mounted
- Small, Compact Design
- Glanged Inlet / Outlet (4")
- Capable of 200 CFM@ 60" of water

Product Uses & Applications

- Tank & Vessel Cleaning
- Process Venting Applications
- Vapor Scrubber Systems
- Carbon Adsorption Systems
