

WASTE MANAGEMENT & RECYCLING

We don't just move waste — We manage it smarter.

Our Environmental Solutions team delivers comprehensive waste management programs that simplify compliance, reduce cost, and protect the environment. Whether it's industrial wastewater, hazardous waste, or non-hazardous solids, Spectrum provides turnkey services from profiling and collection to treatment, disposal, and reporting.

With our permitted facility in the Gulf Coast we handle complex waste streams with precision and accountability under strict CWA and RCRA compliance. Our partnered facilities allow Spectrum to manage all special waste streams. Our experts work side by side with your team to ensure every transfer, manifest, and treatment meets or exceeds regulatory standards.

OUR CAPABILITIES

- **Centralized Wastewater Treatment:** Multi-stage physical, chemical, and biological treatment for hazardous and non-hazardous liquid waste.
- **10-Day RCRA Transfer Authority:** Safe, compliant short-term hazardous waste storage for the Gulf Coast industrial corridor.
- **Beneficial Reuse Programs:** Transform waste into value through coproduct recovery, blending, and secondary market distribution.
- **Site-Based Support:** Embedded environmental professionals to manage compliance, waste audits, and documentation on-site.
- **Turnkey Execution:** 24/7 logistics, profiling, and coordination—so your operations never stop.
