

SPECTRUM CAPABILITIES

At Spectrum, our mission is simple: to provide smarter, more efficient, and sustainable water solutions. We are driven by a passion for innovation, environmental responsibility, and client success. Our team of in-field experts works closely with clients to develop custom solutions that not only address immediate water management needs but also lay the foundation for long-term environmental sustainability.

WATER SOLUTIONS

At Spectrum, Water Solutions is where advanced treatment science meets hands-on expertise. From patented Turbo-Phase dewatering boxes to turnkey commissioning, bypass, and recycling systems, our engineers, chemists, and field crews work side-by-side with your team to turn compliance challenges into performance gains.

CARBON SOLUTIONS

Spectrum's Carbon Solutions division delivers end-to-end activated carbon programs for liquids and vapors—from first pass application consulting through media changeout, reactivation, and compliant disposal.

ENVIRONMENTAL SOLUTIONS

Spectrum's Environmental Solutions division simplifies the complex world of industrial waste management and environmental compliance. Backed by embedded field teams and a nationwide buyer network, we turn hazardous and non-hazardous waste streams into compliant discharges, reclaimed water, or even revenue-generating coproducts, giving clients a single point of accountability and the peace of mind that comes from true technical excellence.

EQUIPMENT SOLUTIONS

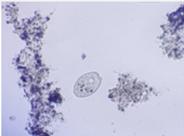

Spectrum provides a full suite of field proven equipment—available for short term rental, standard off the shelf sale, or custom build to spec fabrication—so industrial, municipal and environmental operators can keep projects on schedule and plants in compliance. Every unit is supported by Spectrum's onsite technicians and process chemists, giving clients the human expertise they need to achieve maximum uptime and lowest total cost of ownership.

SPECTRUM CAPABILITIES

At Spectrum, we work with clients across North America and around the globe to engineer and implement customized solutions to wastewater challenges of all kinds.

Our in-house wastewater laboratory allows our experts to study your waste stream and identify any inefficiencies in your waste treatment experience. Then, if needed, our experts create customizable dewatering and clarification equipment to effectively support your custom solution.

BIOLOGICAL TREATMENT: We develop customized biological treatment formulas to solve your process challenges. With a single sample, we can formulate custom nutrient and bacterial blends to maintain a viable biological population for optimal wastewater treatment.

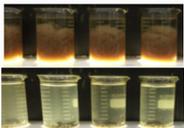

CHEMICAL TREATMENT: We offer a complete line of wastewater treatment chemicals for industrial and municipal wastewater clients to improve wastewater treatment processes, reduce costs, and solve compliance problems.

WASTEWATER SOLUTIONS: We work with both industrial and municipal clients to find the most effective equipment and processes to ensure effective wastewater treatment that is compliant and environmentally friendly, both longterm, permanent and short-term, mobile solutions.

WASTEWATER EQUIPMENT MANUFACTURING: We provide fully customized solutions for dewatering applications across multiple industries. Our team of experts can recommend or engineer simple, timely solutions to fit your unique needs and budget.

CHEMICAL CLEANING: Our team of experienced problem-solvers, chemists, and engineers is ready to work with you to find the optimal solution to your chemical cleaning and decontamination needs, from project evaluation and planning through successful completion.

POND DREDGING: Our team provides an innovative, cost-effective process for removing solids from your pond or tank and dewatering them quickly and efficiently, eliminating transportation and disposal costs and returning your lagoon to peak operation.

BENEFICIAL REUSE: We offer solutions for your waste streams to protect the environment, cut down on disposal fees, and reduce liability risks. With over 20 years of technical and regulatory experience, our team is available to consult on, manage and execute beneficial reuse projects
